

## Rene Prepares For Independence

We are looking forward to having Rene come to live in Siguatepeque. Rene has lived at the Children's Home with his brother and sisters for many years. We will be setting him up in housing, helping him find a job, and looking into educational opportunities for him. Please, keep him in your prayers. This is a huge step for Rene. Pray for us as we guide him and depend on God to provide financially for his needs through us.

## Smokeless Stoves For Poor Families

In Honduras there are many homes that cook over open fires or use wood in crude ovens without a chimney. As you can imagine, with that much smoke in the house, there are many children with lung problems.

Our Honduran church family has chosen to be part of the **solution** through helping provide poor families smokeless stoves to cook upon. These stoves are cool to the touch so they help curtail the many serious burns children receive each year through falling into hot stoves or fires. They are also practically smokeless requiring no chimney and cost us about \$50.00 each. What a blessing to poor families which also opens the door to sharing the love of Christ.

**15 Smokeless Woodstoves in the back of my car. Only 85 left to go**

## Emma, Deeper Into Ministry

It has been music to our ears to hear Emma complain. She has been saying, "*I want to do more!*" Now she can. This past month our sister church in a very poor rural area allowed Emma to begin helping minister to poor kids. The hope is to tutor, build relationships, and then share Christ.

**School is free in Honduras but** if you do not have supplies and a uniform you cannot attend. In order to help launch

Emma, this month we bought enough school supplies to allow 20 kids to go to school. It was a double blessing launching Emma and providing for a significant need.

## Kirby Lives

It is amazing that Kirby is alive. We ran over him last month and our car is very large and extremely heavy. Everyone thought Kirby was a goner. We did not have confidence in the veterinarian in our town because he was unable to save our other dog when she became ill.

At first it seemed that Kirby's back was broken and that he had significant internal injuries. He was dragging his back half and his urine was bloody. We were sure we were looking at kidney failure. Of course, we all felt awful. This would have been a huge blow to our kids.

We prayed and took him to the local "vet". Miraculously, he completely healed after spending a month in the house being nursed back to health. **Thank you God!**

parade**

## Furthering Jenny's Education

This month Jenny finished at the, **Escuela Especial** (*the special school*). She has a 6 grade education at age 17. We were not sure what to do with here educationally. There is no GED program in Honduras. The only option we saw was night school which would only allow her to complete one grade per year. That was just too slow.

**We began to pray** and talk to missionary friends about the situation. The answer came from a friend who discovered a new educational program at a conference. It is video augmented, approved by the government, and possible to do at home. This program will allow her to move through grades as fast as she is able. Pray for us as we move into this new endeavor.

## Please remember us in your end of year giving
